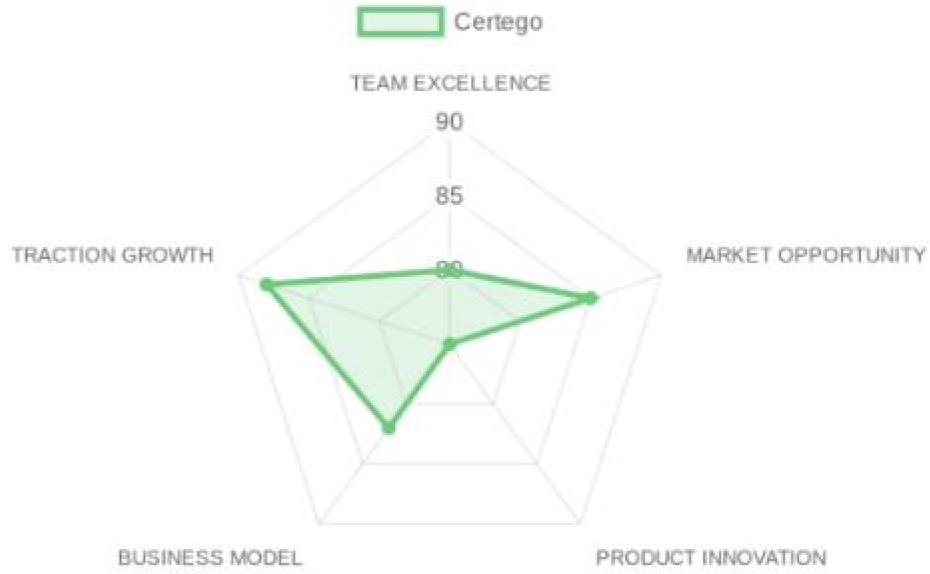
NOTE: This is a raw pre-screening score. Thesis weights are applied in the Synthetic GP qualification pipeline after angle detection.



———————————————

TEAM EXCELLENCE 80/100
MARKET OPPORTUNITY 85/100
PRODUCT INNOVATION 75/100
BUSINESS MODEL 82/100
TRACTION & GROWTH 88/100

———————————————

PRE-SCREENING SCORE: 82/100 → 🟡 POSITIVE SIGNAL (80-84)

———————————————

❓ In a NUTSHELL : Certego is a Managed Physical Security & Access Control player that enables property owners, schools, and critical infrastructure managers to secure physical environments by integrating electronic access control with scalable cloud-hosted management.

⚠️ The PROBLEM : Property managers are constantly forced to juggle fragmented, legacy locking hardware and disjointed surveillance systems that require manual onsite key administration and expose properties to severe security and compliance vulnerabilities.

✅ The SOLUTION : Certego unifies physical locking elements and camera hardware into a centralized, API-enabled cloud-hosting platform that handles real-time electronic access, AI-driven monitoring, and redundant security database updates automatically.

🚀 The GTM : Certego prioritizes regional commercial, public sector, and critical infrastructure portfolios through direct, branch-led relationships, using localized hardware installation trust as a low-friction entry point to embed long-term management and software contracts.

———————————————

👨🏻 TEAM EXCELLENCE (20%) | Score: 80/100
Certego leverages a massive decentralised branch structure with deeply trusted regional manager profiles, although it lacks a centralized venture-backed tech-founder DNA at its core.
· Founder-Market Fit (25%) | Score: 78/100: Executive operational leadership is dominated by high-pedigree corporate stewards and M&A leads like Fredrik Tingström rather than early-stage product founders, utilizing strong corporate execution playbooks.
· Track Record (25%) | Score: 82/100: Backed by Nalka Invest AB, the executive team exhibits strong industrial roll-up experience and a history of successful regional security integrations.
· Leadership (25%) | Score: 80/100: General leadership is strong, employing over 1,200 specialized workers across more than 80 locations in the Nordics, maintaining highly standardized branch execution systems.
· Completeness (25%) | Score: 80/100: The organizational chart shows a highly functioning corporate machine with a dedicated M&A division and operational hierarchy, though digital software product ownership is structurally buried under physical service divisions.

🌊 MARKET OPPORTUNITY (20%) | Score: 85/100
The Nordic market is highly supportive of real estate digitisation and electronic hosting, with rigid regulatory and compliance frameworks demanding integrated physical-digital systems.
· Size & Growth (25%) | Score: 84/100: The target market for integrated hardware hosting across Nordic commercial portfolios is expanding rapidly, with Certego alone capturing over EUR 240 million in absolute turnover.
· Timing Why Now (25%) | Score: 88/100: Propelled by the rapid obsoletion of mechanical keys and the emergence of API-ready smart key devices, property owners have an immediate, non-negotiable need for unified cloud security control panels.
· Competition (25%) | Score: 82/100: Strong competition from groups like Prosero and Bravida is balanced by Certego's dense regional coverage and the highly localized nature of physical-security customer relationships.
· Expansion (25%) | Score: 86/100: Strategic acquisitions (e.g., Scanview and Monitor Larm) provide excellent vectors to expand geographic footprints and physical CCTV/alarm services rapidly.

💡 PRODUCT INNOVATION (20%) | Score: 75/100
Certego delivers a highly functional cloud-hosting layer on top of premium third-party locking systems, focusing on solid execution over fundamental deep-tech orchestration IP.
· Differentiation (25%) | Score: 74/100: Strong operational consolidation of CCTV, AI surveillance, and electronic access systems, though the core lock and camera hardware depends fundamentally on legacy OEMs like ASSA ABLOY.
· Product-Market Fit (25%) | Score: 80/100: High platform utilization is demonstrated by prestigious, public critical infrastructure framworks like the June 2026 Sinfra agreement in Sweden.
· Scalability (25%) | Score: 72/100: While hosting is structured around scalable ISO 27000 data centers, the initial high friction of physical on-site installation and field labor poses a limit to purely digital scalability.
· IP & Barriers (25%) | Score: 74/100: Barriers are constructed primarily on localized service execution and complex physical systems integration, bolstered by strategic security certifications, rather than proprietary software patents.

💼 BUSINESS MODEL (20%) | Score: 82/100
Certego is executing a powerful hybrid transition model, driving up overall corporate enterprise valuation through highly sticky recurring SaaS hosting contracts.
· Unit Economics (25%) | Score: 80/100: Upfront hardware sales and installation contracts offset the capital-intensive deployment process, enabling customer-funded paths to high-margin recurring software hosting.
· Revenue Model (25%) | Score: 84/100: Solid distribution between contract-based physical system installation and recurring 24/7 cloud security and monitoring subscriptions, yielding a highly predictable cash-flow profile.
· Monetization (25%) | Score: 82/100: Clear customer journeys ranging from standard mechanical repairs to high-tier cloud hosting subscriptions with built-in redundancies, updates, and maintenance.
· Capital Efficiency (25%) | Score: 82/100: Substantial financial support from Nalka Invest coupled with high independent revenue production minimizes cash-burn risk, supporting a solid self-funded run rate.

📈 TRACTION & GROWTH (20%) | Score: 88/100
Certego showcases stellar regional execution, utilizing a structured, rapid consolidation strategy across the Nordic market.
· Revenue Growth (25%) | Score: 88/100: A massive annual turnover of over EUR 240 million highlights its prominent status, further fueled by systematic M&A addition of complementary target entities.
· Customer Validation (25%) | Score: 90/100: Deep trust established with highly secure public institutions, schools, hospitals, and critical infrastructure companies like Sinfra.
· KPI Progression (25%) | Score: 85/100: Sustained organizational expansion is evident, supported by a 1,200+ employee base and structured recruitment pipelines for technical managers.
· Market Penetration (25%) | Score: 89/100: An extensive footprint featuring more than 80 locations across Sweden, Norway, and Finland proves its localized system redundancy and distribution moats.

———————————————

🔍 RISK TO UNDERWRITE :
Certego's primary risk lies in the assumption that legacy physical-lock installers can be effectively transformed into high-velocity digital SaaS software distributors without incurring massive margin decay. If local branch managers fail to aggressively switch clients to recurring cloud hosting subscriptions, the group risks stagnating as a capital-heavy physical contracting business with limited platform-level valuation multiples.
This strategic tension is structurally resolvable primarily through time, post-merger integration data, and detailed digital transition cohort audits during diligence.

CERTEGO'S EXECUTIVE SUMMARY (2)

🗝️ KEY COMPETITIVE ADVANTAGES :
• Dense regional network spanning over 80 Nordic locations, ensuring rapid local deployment and customer trust.
• Unified hybrid offering that bundles physical installation logistics directly with secure, ISO 27000 compliant cloud-hosting software.
• Highly structured M&A engine led by dedicated corporate development teams, driving efficient target consolidation.
• Prestigious public-sector security frame agreements like Sinfra, providing long-term cyclical protection.

🧱 MOAT : MODERATE
Certego builds a localized switching-cost moat by integrating access control networks directly into building security systems, making system displacement extremely expensive for property managers once thousands of user badges are active. This moat compounds as buildings migrate to the centralized cloud hosting platform, establishing high-margin system-of-record dependencies that resist simple hardware commoditization. However, this defensive layer remains vulnerable to standard third-party hardware component updates, leaving the company reliant on robust local customer support to retain its position.

⚖️ ASYMMETRIC WAGER
• The Bull Case:
Certego successfully shifts its entire legacy customer base to premium, cloud-hosted SaaS environments while buying up local locksmiths at low multiples, cementing its position as the undisputed physical-digital security operating system of Northern Europe.
• The Bear Case :
Aggressive M&A integrations stall due to operational friction among local branches, leaving Certego with high overhead costs and low organic growth, visible as soon as margins from newly acquired entities begin to compress.

🚩 RED FLAGS
• Universal Risks: Physical security services are severely limited by manual labor shortages and high field-technician turnover, dragging down gross profit expansion capabilities.
• Thesis-Specific Mismatches: High dependency on capital-intensive physical-asset M&A contradicts traditional pure-play, zero-marginal-cost software distribution strategies.

📝 FIRST MEETING PREP KIT
While Certego shows classic PE-roll-up characteristics, its long-term investment viability depends entirely on whether it can successfully scale high-margin cloud security subscriptions.

• The Investment Angle: We are betting on a massive, highly defensive real estate footprint that can be programmaticly monetized via cloud SaaS upgrades, yielding software-level recurring cash flows on top of stable local infrastructure.

• Killer Questions for First Call :
- How do you align localized branch manager incentives to prioritize selling complex digital cloud subscriptions over high-volume offline mechanical key jobs?
- What is the precise share of multi-year contract customers who have migrated to cloud hosting, and what has been the historical churn rate of those migrations?
- What is the difference in lifetime value and payback period between an M&A-acquired customer account and an organic customer account once technical integration labor is factored in?

• First Meeting Go/No-Go Signal :
We will advance if the executive team demonstrates that proprietary cloud hosting fees represent more than 20% of net revenues and are growing at over 25% organically; we will terminate the process if hosting growth is flat or if recurring revenues are trailing trailing equipment installation loops.

🌐 DATA CONFIDENCE : MEDIUM
• Historical metrics detailing internal software margins are private, requiring careful pre-diligence focus on contract-level unit economics.
• DATA GAPS : Pure-play SaaS ARR breakdown • Cloud-hosting user retention rates • Historical acquisition target multiple details.

Certego's position in the value chain

In a fast memo you don't have access to the value chain analysis

VALUE PROPOSITION

Value Proposition: CERTEGO provides complete security solutions to protect everything worth guarding, offering design, installation, and management of access and monitoring systems across the Nordic region.
Ideal Customer Profile (ICP): Property owners, housing cooperatives (BRFs), schools, hospitals, industrial facilities, and critical infrastructure managers.
B2B or B2C: B2B Focused. While they mention 'the home', the primary operations target commercial property management and critical infrastructure.
Industry: Security Systems & Property Management Services.
Contact & Legal: Entity Name: CERTEGO Sverige / Nalka Invest AB. Founding Year: 2015. Locations: 80+ locations in the Nordics. Support available via contact forms and regional offices.
Key Client Examples & Testimonials: Clients include housing associations, office properties, schools, hospitals, and critical infrastructure providers. Major milestone partners include Nalka Invest AB (Parent) and recently acquired entities like Scanview and Monitor Larm.

PRODUCT FEATURES

Core Solution: Integrated electronic and mechanical security systems including access control, monitoring, and professional hosting services.
Feature Encyclopedia: Locks and locking systems | Alarm and alarm services | CCTV/Camera surveillance with AI | Fire safety and fire alarms | Property mailboxes | Value and key safes | Cloud Hosting.
Technical Capabilities: Hosting services with ISO 27000 standards | AI-driven surveillance | API-ready security systems | Scalable server environments | Redundant internet and power supplies for data centers | Encrypted backups and firewalls.
Use Cases: Securing commercial premises, managing keys for shared properties, preventing fire damage in warehouses, and providing cloud-based IT drift for security hardware. Integrated digital and physical security solutions protecting critical infrastructure across the Nordics. Certego installs high-tech locks, alarms, and cameras for buildings like hospitals and schools. Then, they connect these devices to their own secure cloud system, allowing clients to manage building security and access from anywhere.

BUSINESS MODEL AND PRICING

Business Model Analysis: Hybrid. Project-based hardware installation fees combined with recurring SaaS/Managed Service fees (Hosting).
Revenue Streams & Pricing Tiers: Subscription-based Hosting services; Installation and maintenance contracts; Equipment sales (locks, safes, cameras). Annual turnover reported at over EUR 240 million.
Plan Features: Hosting plans include: Predictable IT-drift, security updates, hardware maintenance, and 24/7 monitoring.
Hidden Costs & Terms: Not explicitly listed, but typically includes hardware installation labor and setup fees for system migration to their hosting environment.

TEAM & COMPANY CULTURE

Company Culture: Values: 'I take responsibility', 'We always want to be better', and 'Together we make it easy'. Focus on diversity, inclusion, and a goal for 2025 to have 25% female employees and 30% women in leadership.

Team Analysis: Nalka Invest AB (Owners). Fredrik Tingström (Head of M&A). Anders Rundgren (former Head of M&A, transitioned to consultancy role). Branch Managers (e.g., Sundsvall Branch Manager). Over 1,200 employees across the Nordic region.

Job Offers & Titles: Filialchef (Branch Manager) in Sundsvall; Project Management and Work Management roles.

Estimated Headcount: Total: 1,200+. Sub-estimate: 500 in Sweden. Large distribution of Local Service Experts, Project Managers, and Certified Administrators.

CEO

Data unavailable in source file.

Certego's SWOT analysis

STRENGHTS

Certego holds framework agreements such as Sinfra that grant direct access to Swedish critical infrastructure contracts.

The hybrid model pairs one-time installation revenue with recurring hosting fees under ISO 27000 standards, creating stable cash flow.

A dedicated Head of M&A role with documented leadership continuity accelerates targeted acquisitions across the Nordics.

1200-plus employees distributed across eighty-plus Nordic sites enable same-day response for large property portfolios.

AI-driven CCTV and API-ready access systems match the technical requirements of hospitals and industrial clients.

WEAKNESSES

Growth depends on serial acquisitions, which exposes the company to integration delays and margin dilution.

No public profile or statements are available for the CEO, limiting external clarity on strategic direction.

Hardware sales and installation work still represent a large share of revenue and remain exposed to construction cycles.

The 2025 gender target of 25 percent female employees signals current under-representation that narrows talent access.

Ownership by Nalka Invest AB reduces visibility into independent capital allocation and exit options.

OPPORTUNITIES

Geopolitical pressure on Nordic infrastructure is increasing public-sector security budgets that Certego is already positioned to capture.

Conversion of mechanical locks to cloud-managed digital systems creates high-margin recurring revenue from existing BRF and office clients.

The established M&A function can extend the platform into Finland and Norway markets where branch density remains lower.

Rising demand for integrated fire, alarm, and surveillance bundles aligns with Certego's full lifecycle service offering.

API connectivity enables partnerships with property-management software providers for embedded security modules.

THREATS

Larger pan-European security groups can outbid Certego on multi-year framework tenders using scale advantages.

Stricter data-residency rules could force costly redesign of the current hosting environment.

A prolonged slowdown in Nordic commercial construction would directly cut installation volumes.

Brand confusion with the unrelated Italian cybersecurity firm creates search and credibility friction.

Poor acquisition execution could saddle the company with overlapping regional operations and redundant costs.

ACTION PLAN

How to defend? The recurring hosting base and framework agreements form a durable moat because clients face high operational disruption when changing providers. Leadership must maintain centralized deal discipline and avoid paying premiums that cannot be recovered through integration synergies. Continued technical upgrades to ISO-certified cloud services keep the installed base sticky against pure hardware rivals.

How to win? Certego should double down on the Sinfra channel and convert every installation into a multi-year hosting contract. The formal M&A engine must be used to buy complementary digital-lock and AI-camera specialists that raise switching costs. Geographic density already built in Sweden should be replicated in Norway and Finland before larger competitors consolidate the same route density.

What would be fatal? A single poorly integrated acquisition that triggers margin compression and client churn would coincide with a tightening Nordic construction cycle. The resulting cash-flow shortfall would force Nalka to either inject capital or sell the platform at depressed multiples before recurring revenue has scaled enough to offset the damage.

What to fix? The acquisition-heavy model requires tighter post-merger integration playbooks and clearer retention targets for acquired branch managers. Absence of visible CEO communication must be addressed by appointing or surfacing a public face who can articulate strategy to both employees and public-sector buyers.

Synergies between Certego and Prosero

Sinfra Critical Infrastructure Revenue Capture (Soft Revenue): Prosero cross-sells its KameraPortalen video management software directly to Certego tenants using the pre-negotiated Sinfra framework agreement to bypass municipal procurement cycles within 12 months.
Estimated financial impact: High
Time to value: Mid-Term (6-18m)
Difficulty: Medium
Nordic Field Technician Route Optimization (Hard Cost): Consolidating overlapping branch routes and technical support hubs in Sweden and Norway reduces dispatch mileage and overhead expenses within 6 months.
Estimated financial impact: Medium
Time to value: Immediate (<6m)
Difficulty: Low
CEUPP QR-Code Compliance Upsell (Soft Revenue): Prosero deploys its CEUPP QR-code compliance system across Certego's 80 branch systems, transforming Certego's one-time lock repairs into recurring safety compliance contracts within 18 months.
Estimated financial impact: Medium
Time to value: Mid-Term (6-18m)
Difficulty: Low
Unified ISO 27000 Cloud Platform Moat (Structural): Prosero migrates its cloud database backups to Certego's ISO 27000 certified hosting configuration, eliminating third-party enterprise IT risk within 12 months.
Estimated financial impact: Medium
Time to value: Long-Term (>18m)
Difficulty: High

Conviction from an AI General Partner on Certego

Angle
This deal is evaluated under the Nordic Physical Security Integrator Consolidation angle — Certego's branch network, Sinfra certification, and ISO 27000 hosting are the exact assets Prosero's MUST_ACQUIRE criteria require. The Recurring Multi-Site Maintenance and Remote Monitoring angle also achieves strong alignment (100 percent Q&A confirmation), reinforcing the thesis from the recurring revenue dimension. The DACH Technical Security Expansion angle was ruled out because Certego's operations are exclusively Nordic with no evidence of activity in the German, Austrian, or Swiss markets.

Market
The Nordic physical security market is consolidating rapidly under NIS2 pressure, with hundreds of profitable local integrators unable to fund digital transformation alone. Certego leads this consolidation with EUR 240 million in revenue, 80-plus locations, and certified public sector access. The competitive landscape features Securitas and Bravida as medium-severity threats, but neither has Certego's combination of physical density and institutional certification.

Timing
The NIS2 directive and the June 2026 Sinfra agreement together confirm this is a perfect opportunity window — compliance deadlines are immediate, Certego is already winning institutional mandates, and the risk of a competing acquirer is real and near-term.

Company
Certego generates EUR 240 million annually through a hybrid hardware-plus-hosting model. The core risk is that only 40 percent of branches run full autonomous hypervision, and SaaS revenue remains minority in the total mix, meaning the platform premium in the valuation thesis is not yet operationally validated. The physical switching-cost moat and the Sinfra framework are the assets that justify the acquisition independent of SaaS upside.

Founder
Fredrik Tingström and the Nalka Invest management team are high-discipline institutional integrators — well-suited to Prosero's decentralized model but without software-first DNA. Branch manager retention is the key post-acquisition human capital risk.

Thesis-fit
Certego is a textbook match for the Nordic Consolidation angle: non-replicable branch presence, institutional certification, proprietary cloud platform, and a management team experienced in branch-led M&A integration. Both tested angles confirm strong fit, making this the highest-conviction acquisition opportunity currently active in the Prosero pipeline.

Verdict
🟢 CALL (M&A) — Certego's Sinfra certification, 80-plus branch locations, and ISO 27000 hosting platform cannot be replicated within any viable timeframe, making this a structural MUST_ACQUIRE for Prosero's Nordic platform leadership strategy; the primary condition before closing is a legal review of the Sinfra interoperability clauses and a 24-month SaaS cohort audit to validate the digital transition economics, both to be completed within 60 days of entering exclusivity.
