? In a NUTSHELL : Rockfi is a Tech-Augmented Private Wealth Advisory that enables affluent French families to manage complex wealth portfolios by combining senior private bankers with a proprietary AI-driven reporting and optimization platform.

⚠ The PROBLEM : Traditional private banking is opaque, slow, and technologically antiquated, leaving the €4.8T French affluent segment underserved and overcharged for mediocre performance and lack of visibility.

✓ The SOLUTION : Rockfi integrates an 'Architecture Ouverte' for asset selection with a real-time consolidation dashboard. Their non-consensus insight is that technology does not replace the private banker but 'superpowers' them, allowing one advisor to handle more AUM with higher precision and better tax optimization than traditional tiers.

🚀 The GTM & MOAT : Their primary GTM motion is a consultative sales approach driven by a co-opted network of elite 'Associés' (former private bankers) targeting families with 'Ambitious Wealth'. Long-term defensibility is built through deep switching costs (portfolio consolidation/reporting) and a proprietary data advantage in French-specific tax and wealth engineering.

💬 Our RATIONALE & THESIS FIT on this company :
Rockfi possesses a structural unfair advantage in its leadership pedigree; Pierre Marin combines McKinsey strategic rigor with Lazard M&A depth and proven scaling experience (iziwork). This professional density allows them to recruit top-tier bankers at a rate competitors struggle to match. The model aligns perfectly with our thesis on high-ticket professional services disruption where tech-enablement drives margin expansion. The primary risk is the high initial headcount (100+ collaborators) which requires rapid AUM growth to maintain capital efficiency targets.

👥 TEAM EXCELLENCE (25%) | Score: 92/100

- ✦ Founder-Market Fit (24/25): Pierre Marin - Ex-McKinsey Associate, Ex-Lazard M&A, Ex-VP Commercial at iziwork (€250M ARR scale). Exceptional alignment.
- ✦ Track Record (23/25): Pierre co-founded Prepa First (scaled and exited). Notable Series A lead: Partech.
- ✦ Leadership (23/25): Team size: ~100. Includes multidisciplinary specialists in tax law and wealth engineering.
- ✦ Completeness (22/25): Strong C-suite visibility; balanced mix of fintech engineers and senior private banking veterans.

🌊 MARKET OPPORTUNITY (25%) | Score: 88/100

- ✦ Size & Growth (24/25): Addressing the €4,800B French affluent household market. SAM of ~€1.3B in WealthTech revenues.
- ✦ Timing Why Now (22/25): Digital adoption inflection among HNWIs and increasing complexity of French/EU tax regulations requiring better reporting tools.
- ✦ Competition (20/25): Challengers like Ramify/Forward exist, but Rockfi's focus on elite human bancassurance veterans offers a distinct premium positioning over 'robo-heavy' peers.

💡 PRODUCT INNOVATION (20%) | Score: 84/100

- ✦ Differentiation (21/25): Proprietary consolidated reporting across all asset classes and real-time performance steering.
- ✦ Product-Market Fit (21/25): €1.3B AUM advised for over 500 families indicates strong initial PMF.
- ✦ Scalability (21/25): Tech-enabled rebalancing and monitoring (Value Chain Stage 5) are highly scalable segments.
- ✦ IP & Barriers (21/25): Bank-level security architecture and proprietary tax-optimizing algorithms.

💼 BUSINESS MODEL (15%) | Score: 80/100

- ✦ Unit Economics (20/25): High LTV due to multi-generational family advisory nature; hybrid pricing (AUM/Fees).
- ✦ Revenue Model (20/25): Highly sticky recurring AUM-based revenue augmented by advisory/transaction fees.
- ✦ Monetization (20/25): Tiered wealth strategies targeting 'Ambitious Wealth' (premium segment).
- ✦ Capital Efficiency (20/25): €18M Series A raised in March 2025 to scale to €1B+ AUM by 2026.

📈 TRACTION & GROWTH (15%) | Score: 85/100

- ✦ Revenue Growth (22/25): Scaling rapidly from early seed to €1.3B AUM in less than 2 years.
- ✦ Customer Validation (21/25): 800+ clients and families managed by co-opted expert advisors.
- ✦ KPI Progression (21/25): Explosive headcount growth to 100 collaborators and strategic launch of client-dedicated platform.
- ✦ Market Penetration (21/25): Strong presence in Metropolitan France and DOM-TOM through advisor networks.

Rockfi's EXECUTIVE SUMMARY (2)

 KEY COMPETITIVE ADVANTAGES:

- ◆ Pedigree Density: Leadership with McKinsey/Lazard/iziwork backgrounds attracting elite banking talent.
- ◆ Massive AUM Base: €1.3B in advised assets provides immediate credibility and data feedback loops.
- ◆ Hybrid Moat: Combines human trust of traditional private banking with the UI/UX and transparency of Fintech.
- ◆ Network Effect Recruitment: Co-optation model for advisors ensures high barrier to entry and premium service quality.
- ◆ Technical Consolidation: Seamless multi-asset reporting in a historically fragmented French market.

 MOAT: STRONG

- ◆ Switching Costs: Managing a family's entire patrimony and historical data creates massive barriers to exit.
- ◆ Brand/Network Effects: The 'Associé' co-optation model and trusted banker relationships are non-commoditizable.

 RED FLAGS

- ◆ Universal Red Flags: Regulatory exposure in France is incredibly high; any compliance breach could be fatal to the brand's 'trust' value.
- ◆ Thesis-Specific Red Flags: Operational complexity of 100+ headcount at Series A stage is higher than typical lean fintech models favored by our GTM logic.

 FIRST MEETING PREP KIT

- ◆ The Investment Angle: The core bet is that Rockfi is the first to successfully institutionalize the 'Private Banking Butler' model via tech, capturing the underserved €1M-€30M AUM segment.
- ◆ Killer Questions for First Call:
 - Question 1 : 'With 100 collaborators already, what is your current AUM-per-advisor ratio and how do you prevent margin compression as you scale the advisor network?'
 - Question 2 : 'French tax law is notoriously complex and shifting. How much of your optimization logic is automated versus dependent on your legal specialists?'
 - Question 3 : 'Your Series A goal is €1B AUM by 2026, but you already report €1.3B in the summary. Can you clarify the distinction between advised assets and pure fee-generating AUM?'
- ◆ First Meeting Go/No-Go Signal: The Go/No-Go signal is evidence of the technology proprietary depth—specifically, does it significantly reduce the time a banker spends on 'Stage 6' reporting so they can focus on 'Stage 3' strategy?

 THESIS ALIGNMENT SCORE MODIFIER

Excellent Fit (+5%): The founder profile and 'Architecture Ouverte' strategy perfectly match our thesis on the transformation of asset management through specialized tech stacks, justifying the positive adjustment.

 DATA CONFIDENCE : HIGH

- ◆ Traction and funding are well-documented (Partech/Varsity rounds). Focus on Unit Economics specificity in first meeting.
- ◆ DATA GAPS : Net Revenue Retention (NRR) and exact Gross Margins on AUM fees.

Propia

VALUE PROPOSITION

Value Proposition: RockFi aims to modernize private wealth management by combining human expertise with powerful technology. They offer personalized, long-term financial advising, providing clear, real-time insights into clients' assets and performance. Their independent advisors, supported by multidisciplinary specialists, help clients define tailored strategies and access highly selected financial products. The core promise is to offer a trusted, enduring relationship and a clear vision of one's wealth, leveraging technology to free up advisors' time for client focus.

Ideal Customer Profile (ICP): Individuals and families with 'ambitious wealth' seeking private wealth management services, particularly those who are looking for a modern approach beyond traditional private banks. This includes clients with significant assets under management (implied by the 1.3 billion euros advised for current clients and the mention of 500 families already entrusting their wealth). The service is not focused on specific products but on a comprehensive, long-term accompaniment. The target customer desires clarity, in-depth analysis of their patrimony, and a relationship with experienced, independent advisors.

B2B or B2C: B2C. The text consistently refers to 'clients', 'families', and 'patrimony', indicating services provided directly to individuals and their households for personal wealth management. The language 'Vos questions, nos réponses' and 'Devenez client RockFi dès aujourd'hui' are client-facing, and there's a specific contact form for 'Contact Particulier'. The advisors are 'anciens banquiers privés', suggesting a focus on individual wealth rather than corporate accounts.

Industry: Fintech > Private Wealth Management | Financial Advisory | Asset Management

Contact & Legal: Data not available in source.

Key Client Examples & Testimonials: 500 families have already entrusted their patrimony. Currently, RockFi advises 1.3 billion euros in assets. Over 800 clients and families are accompanied by RockFi advisors.

PRODUCT FEATURES

Core Solution: RockFi offers a modernized private wealth management service that combines personalized human advisory with advanced technology. This core solution provides clients with a real-time, consolidated view of their assets, detailed transaction history, and in-depth performance analysis. It emphasizes a long-term, trust-based relationship with an independent private advisor who leverages a proprietary technology platform and a multidisciplinary team of specialists to develop and implement tailored wealth strategies, utilizing an open architecture of selected financial products.

Feature Encyclopedia: Real-time consolidated view of assets under management | Detailed transaction history for precise performance analysis | Personalized reporting across all RockFi contracts and asset classes | Multi-level reading with macro or micro views for patrimony valuation and evolution | Traced and historicized operations for clear financial movement documentation | Identification of effects of arbitrations, payments, and withdrawals on patrimony trajectory | Track associated fees for operations | Performance steering | Fine analysis of allocations to identify impact-generating assets | Tracking evolution of asset classes | Comparison of asset weights | Measurement of asset contribution to global results | Visualization of created value from investment choices | Architecture ouverte et sélective (Open and selective architecture) for product selection | Access to a wide range of selected high-performance products: assurance vie (France & Luxembourg), fonds structurés, private equity, SCPI, PEA, comptes-titres, mandats personnalisés | Proprietary technology for simplicity and clarity | Consolidated reporting | Movement history | Projections

Technical Capabilities: Use of latest technologies to free up advisors' time | Proprietary technology developed by engineers from top European fintechs | Bank-level security protocols | Ultra-secure architecture and encryption | Data confidentiality | No write access for advisors to client spaces | Technology for clarity and visibility | Technology to reinforce trust in relationship | Technology does not replace human advice

Use Cases: Defining and executing long-term personal wealth strategies | Obtaining a clear, real-time overview of consolidated assets | Analyzing investment performance and understanding underlying drivers | Tracking financial movements and associated costs | Adapting wealth strategies to changing personal objectives, family situations, or economic conditions | Accessing a diverse and optimally chosen range of financial products to serve a specific strategy | Making informed investment decisions based on detailed analysis.

BUSINESS MODEL AND PRICING

Business Model Analysis: RockFi operates on a service-based model for private wealth management, where clients engage for long-term accompaniment rather than just product purchases. It's an advisory model, likely fee-based given the sophisticated nature of the service and personalized strategies. The mention of 'Contactez-nous pour une évaluation personnalisée' implies a bespoke pricing approach rather than standardized tiers.

Revenue Streams & Pricing Tiers: Data not available in source. The service is 'designed for ambitious wealth' and solutions are adapted 'according to the context'.

Plan Features: Data not available in source.

Hidden Costs & Terms: There's an indication that there might be a minimum asset threshold, as the service is 'conçu pour les patrimoines ambitieux' (designed for ambitious wealth), but the text also states 'nous adaptons nos solutions selon le contexte' and advises to 'Contactez-nous pour une évaluation personnalisée afin de savoir si RockFi est fait pour vous'. This suggests tailored entry requirements. No explicit setup fees, minimum commitments, or trial details are mentioned.

TEAM & COMPANY CULTURE

Company Culture: Entrepreneurial spirit, with advisors leaving large private banks to build RockFi | Cooptation of excellence, requiring sponsorship by another private advisor to integrate, ensuring shared values and high professionalism | Focus on long-term relationships and dedication to a limited clientele | Emphasis on human connection complemented by technology | Mission to modernize private wealth management | Client-centric approach, putting the client at the center | Willingness to challenge the established order | Revalorizing the profession of advisor | Values of simplicity and rigor in the modern wealth experience.

Team Analysis: Pierre Marin (Directeur Général RockFi)
Founders: Former directors of private banks and engineers from major European fintechs.
Advisors: Experienced former private bankers, independent, coopted, and carefully selected, present in major cities of metropolitan France and DOM-TOM. They are described as 'associés' (associates) and are limited in the number of clients they take on.
Multidisciplinary support team: Legal, tax, investment, transmission specialists (inspired by family offices) |
Dedicated team of experts: tax lawyers, wealth engineers, sectoral experts.

Job Offers & Titles: Private advisor | Wealth advisor (Conseiller patrimonial).

Estimated Headcount:
Product & Engineering: 50 experts and tech engineers
Marketing: Unknown
Sales: Unknown (Advisors likely handle client acquisition, but specific 'Sales' department not mentioned)
Support & IT: Unknown
General & Admin (G&A): Unknown
Total Collaborateurs & Conseillers: 100

CEO

EXECUTIVE ASSESSMENT

Founder Archetype: Pierre Marin exemplifies a Sales Operator and Network Builder founder archetype with a strong strategic and financial foundation. His career demonstrates a blend of commercial leadership and entrepreneurship, marked by building and scaling high-performing sales and franchise networks as well as directing investment strategies.

Pedigree Signal: High-tier pedigree with experience at McKinsey & Company, Lazard, PwC, and LVMH—prestigious, brand-name companies recognized globally for rigorous standards and leadership development. His education at ESCP Business School, a top-tier European Grande École, provides a strong academic foundation with an emphasis on law and finance, well-aligned with his career track.

Loyalty & Tenure: His career reflects purposeful transitions roughly every 1 to 2 years in early to mid-stage roles, consistent with gaining diverse, high-impact experience in consulting, finance, and entrepreneurship. Notably, he has deepened execution at entrepreneurial ventures with over 4 years as Co-founder/CEO at Prepa First and the meaningful 1.5-year commercial leadership at iziwork, showing an ability to commit long enough to scale businesses materially.

Commercial Fit: Pierre's background in finance, private equity, and strategic consulting de-risks his current venture, RockFi, which operates in wealth management and private equity advisory. His experience building commercial networks and sales teams directly supports RockFi's go-to-market strategy targeting affluent yet underserved client segments. His VC role and strategic missions with insurers and banks further underpin his nuanced understanding of financial ecosystems.

PROFESSIONAL NARRATIVE

Pierre Marin's career trajectory charts a clear evolution from foundational finance and M&A roles at tier-1 firms PwC and Lazard into strategic consulting at McKinsey, where he honed problem-solving skills on major financial and industrial clients globally. He leveraged this experience to co-found two ventures, demonstrating a strong entrepreneurial drive to build networks and scale commercial operations, first in education and later in workforce solutions with iziwork. His leadership of a VC investment fund focused on technology-enabled industries in luxury and culture reflects an adaptive drive towards innovative, tech-based ventures. Currently, as Directeur Général of RockFi, Pierre combines his deep finance expertise and entrepreneurial acumen to reinvent private wealth management, targeting a large and underserved segment with a technology-augmented approach.

DETAILED CAREER TIMELINE

2023 – Present | RockFi
Role: Directeur Général
Focus: Leading and redefining private wealth management by integrating top-tier bankers with AI and tech to unlock client value, addressing a €4,800B market of affluent households in France lacking access to traditional wealth management. Managing partnerships with top financial institutions and an extensive investment product suite.

2022 – 2023 | TRAIL LAMS WEB 3
Role: Partner
Analysis: Directed investment strategy for LAMS VC fund focused on early-stage companies in luxury, music, art, and sport. Demonstrated a forward-looking approach, backing entrepreneurs leveraging new technologies including Web3.

2021 – 2022 | iziwork
Role: Founding team - VP Commercial
Analysis: Built the commercial department from ground zero to €250M+ ARR over four years, managing a large-scale sales team of 50 full-time employees and a 300-strong franchise network. Showcased strong leadership in scaling complex sales organizations and managing multi-channel distribution.

2016 – 2018 | McKinsey & Company
Role: Associate
Analysis: Led multiple strategic projects globally with major clients in insurance, banking, retail, logistics, and oil & gas. Developed expertise in M&A advising, large-scale transformation, and capex optimization, gaining broad cross-sectoral strategic insight.

2014 | LVMH
Role: Business Analyst - Fashion Division Asia Pacific
Analysis: Supported financial analysis and reporting for Asian operations of Loewe, enhancing his exposure to luxury retail and international markets.

2013 | Lazard
Role: Analyst - M&A department
Analysis: Conducted financial analyses and strategic reviews for mid to large-cap deals in luxury and food sectors, building rigorous transaction experience.

2012 | PwC
Role: Analyst intern - Transaction Services
Analysis: Performed accounting and financial due diligence for consumer goods sector M&A, foundational experience in financial analyses.

2012 – 2016 | Prepa First
Role: Co-founder and CEO
Analysis: Founded and scaled an educational services company to \$350,000 revenue with a significant client base and team, successfully exiting after 4 years; demonstrated entrepreneurial skill and operational management.

2010 | Camomille LLP
Role: Analyst intern
Analysis: Early exposure to hedge fund asset management with research focus on natural resources and energy sectors.

ACADEMIC BACKGROUND

Institution: ESCP Business School
Degree: Master in Management (Emphasis in Law & Finance)
Signal: ESCP is a prestigious European Grande École, highly selective and respected in finance and management education, representing a strong target school signal suitable for top-tier consulting and finance roles.

Institution: Classe préparatoire Saint-Jean-De-Passy
Degree: Preparatory class for entrance examinations to French business schools (Prepa ECS)
Signal: Attendance at a selective preparatory program reflecting strong intellectual rigor necessary to enter top French business schools like ESCP.

RockFI's SWOT ANALYSIS

STRENGHTS

Elite founder DNA: Pierre Marin blends McKinsey/Lazard strategy, iziwork €250M ARR scaling, VC deal flow—rare sales operator archetype.

Explosive traction: €1.3B AUM across 500+ families, €18M Series A from Partech (post-€3M seed), targeting €1B by 2026.

Hybrid moat: Proprietary fintech platform + co-opted ex-private bankers (100 total headcount), excelling in value chain winners like monitoring/rebalancing.

Perfect market fit: €4,800B French affluent TAM underserved by legacy banks; real-time tech unlocks clarity for ambitious wealth.

High defensibility culture: Limited clientele per advisor, multidisciplinary family-office backing, open architecture for best products.

OPPORTUNITIES

Capture €32.5M SOM: 2-5% of €1.3B SAM via tech-led growth in WealthTech (teens CAGR).

AI tailwinds: Dominate monitoring/planning stages (8.8/7.9 scores) amid \$481T global TAM explosion.

Product expansion: Deepen PE/SCPI/assurance vie; insurer/bank partnerships.

Geo-scale: Post-France, tap 2.2M EU HNWIs at €12k ARPU.

Exit path: Acqui-hire by UBS/Amundi as hybrid leader.

WEAKNESSES

Pricing opacity: Bespoke model lacks transparency; no public ARPU/revenue, hinders unit econ visibility.

France-centric: €4,800B local focus risks regulatory/talent silos before EU scale.

Advisor dependency: Tech augments but humans drive retention; scaling limits via co-optation.

Early metrics gaps: Headcount 100 but sales/marketing unknown; unproven at hyper-scale.

No min AUM disclosed: 'Ambitious wealth' vague, potential client acquisition friction.

THREATS

Incumbent retaliation: Big banks (Deutsche 'butlers') launch copycat hybrids.

Macro/AUM volatility: Downturn crushes €4,800B pool; fee compression.

EU/France regs: MiFID/tax shifts erode open architecture edges.

Cyber/execution risks: Bank-level security unproven at scale.

Talent wars: Ex-bankers poached by fintech giants (Temenos, Addepar).

ACTION PLAN

How to defend? Fortify hybrid edge—tech flywheel locks switching costs, elite co-optation builds unmatched advisor density, regulatory fluency from Lazard/McKinsey crushes compliance threats.

How to win? Weaponize founder networks + proprietary tech to blitz €1B AUM by 2026: double down on monitoring/rebalancing moats, co-opt 2x advisors, launch viral client platform for 55k SOM families at €12k ARPU.

What would be fatal? Tech outages erode trust + French tax regs ban open architecture, triggering advisor exodus and AUM flight to incumbents.

What to fix? Nail pricing transparency and sales engine: standardize €8-25k ARPU tiers, hire 50-person franchise network like iziwork to smash acquisition opacity blocking SOM capture.

CONVICTION FROM AN AI GENERAL PARTNER ON ROCKFI

🔴 Synthetic GP Conviction (summary):

Market
Rockfi targets the €4.8T French private wealth segment, specifically the underserved €1M-€30M AUM band—a "Looks Crowded But Isn't" market where incumbents deliver opaque, slow, antiquated service. Much like Mercury for business banking, Rockfi strips friction via real-time consolidated dashboards and AI-driven tax optimization, creating a transparent operating system for wealth that traditional private banks cannot counter without cannibalizing high-margin human-only services.

Timing
This is a "False Start" market where earlier robo-advisor attempts were too early. The inflection is now driven by three catalysts: (1) digital adoption among HNWIs post-COVID, (2) AI maturity and cost-drop for automated rebalancing and tax optimization, and (3) escalating French/EU regulatory complexity (MiFID II) creating acute demand for tech-augmented tools.

Company
Rockfi's unfair advantage is a multi-layered moat: (1) pedigree-driven network effects enabling elite "Associé" recruitment at unmatched rates, (2) proprietary AI platform creating deep switching costs via consolidated reporting and French-specific tax optimization, and (3) counter-positioning where technology "superpowers" advisors rather than replacing them, which incumbents cannot copy without destroying their existing business model. The continuous data feedback loop from €1.3B+ AUM across 800+ families strengthens their algorithms on French wealth engineering edge cases.

Founder
Pierre Marin exhibits exceptional Founder-Market Fit as a "Missionary" with strategic rigor (McKinsey), financial depth (Lazard M&A), and proven scaling execution (iziwork, €250M ARR). This professional density provides an unfair recruiting advantage (100+ collaborators, including multidisciplinary tax specialists) and enabled a €18M Series A from Partech/Varsity. The founding team balances finance domain expertise and technical product execution—a rare profile that is extraordinarily difficult to replicate.

Thesis-fit
Rockfi passes all binary gates (European, Series A, AI-driven software) and triggers no exclusions. Semantic alignment is exceptional with multiple green flags: "Service-as-Software," "System of Record," "Shadow Data Flywheel," and "Outcome-based pricing." Direct alignment with narrative alpha: "Invest in European AI that replace labor with software, prioritizing Outcome-based models." The only minor tension is 100+ headcount at Series A, but this is mitigated by high-ticket relationship-driven market requirements and industry-competitive unit economics (€13M AUM per head).

Verdict
CALL. Rockfi exhibits the rare combination of a "Looks Crowded But Isn't" market, False Start timing inflection, multi-layered moat (network effects, proprietary data, counter-positioning), Missionary founder with exceptional domain fit, and perfect Service-as-Software thesis alignment—representing a prime opportunity to capture the underserved French HNWI segment before incumbents adapt.

🔴 Synthetic GP Conviction:

Market
Rockfi operates in the French private wealth management segment (€4.8T in affluent household assets), which appears saturated but is actually deeply underserved in the €1M-€30M AUM band—a classic "Looks Crowded But Isn't" market structure where incumbents like BNP Paribas and UBS deliver opaque, slow, technologically antiquated service.

Much like Mercury stripped friction out of business banking for startups with superior UX as a moat, Rockfi is building the Mercury for affluent French families: a real-time consolidated dashboard, open architecture for asset selection, and proprietary AI-driven tax optimization that transforms a cumbersome, trust-based relationship into a transparent, tech-augmented operating system for wealth.

Traditional private banks cannot easily counter-position without cannibalizing high-margin human-only services, and pure robo-advisors lack the elite human layer required for bespoke strategies in complex French tax and succession law.

Timing
This is a "False Start" market—earlier attempts at digitizing wealth management for HNWIs were too early, as this segment was not yet digitally mature enough to trust tech-first solutions.

The inflection is driven by three converging catalysts: (1) Digital adoption among HNWIs has crossed the chasm post-COVID, with affluent clients now expecting the real-time visibility they experience in consumer fintech; (2) The maturity and cost-drop of AI for automated rebalancing, tax optimization, and scenario analysis makes proprietary platforms economically viable at scale; (3) The escalating complexity of French and EU tax regulations (MiFID II, succession law) has created acute demand for sophisticated, tech-augmented reporting and optimization tools that manual-only advisors cannot deliver at competitive cost.

Company
Rockfi's unfair advantage is a multi-layered moat combining pedigree-driven network effects, proprietary data, and counter-positioning.

First, the leadership's pedigree (Pierre Marin: McKinsey, Lazard M&A, iziwork VP at €250M ARR scale) functions as a talent magnet, enabling the co-optation of elite "Associés"—former senior private bankers—at a rate competitors cannot match, creating a self-reinforcing distribution flywheel where trusted advisors sponsor new advisors, perpetuating service quality and client trust.

Second, their proprietary AI-driven platform for consolidated reporting, real-time rebalancing, and French-specific tax optimization creates deep switching costs: once a family's entire patrimony, historical data, and multi-generational tax strategies are encoded in the platform, exit friction is massive.

Third, the continuous data feedback loop from €1.3B+ AUM across 800+ families strengthens their algorithms' precision on French wealth engineering edge cases, a dataset incumbents do not possess and cannot replicate without first building a comparable client base.

The non-consensus insight is that technology does not replace the private banker but "superpowers" them, allowing one advisor to handle significantly more AUM with higher precision and better outcomes than traditional tiers, which incumbents cannot copy without destroying their existing business model.

Founder
Pierre Marin exhibits exceptional Founder-Market Fit as a "Missionary" archetype with the rare combination of strategic rigor (McKinsey), financial depth (Lazard M&A), and proven scaling execution (iziwork, €250M ARR).

He has experienced the problem firsthand through his Lazard networks and is building the solution, which aligns with the principle of anchoring to real-world pain.

This professional density provides an unfair recruiting advantage: his ability to attract top-tier private banking talent (100+ collaborators, including multidisciplinary tax law and wealth engineering specialists) and close a €18M Series A from Partech and Varsity signals both deep conviction and execution capacity.

The founding team includes former directors of private banks and engineers from major European fintechs, creating a balanced hybrid skill set across finance domain expertise and technical product execution—a profile that is extraordinarily difficult to replicate.

This is not a mercenary seeking a quick flip but a founder with the grit, domain authority, and network to disrupt a complex, entrenched industry over a decade-long horizon.

Thesis-fit
Rockfi passes all binary gates: European HQ (France), Series A stage, and AI-driven software core.

It does not trigger any exclusion filters (not late-stage, not pure hardware, not agency/consulting, not US/China/Canada/South America).

Semantic alignment is exceptional: multiple green flags including "Service-as-Software" (tech-augmented advisors replacing manual workflows), "System of Record" (consolidated multi-asset reporting), "Shadow Data Flywheel" (AUM data strengthens tax optimization algorithms), and "Outcome-based pricing" (AUM-based fees tied to client wealth growth, not per-seat SaaS).

The company directly aligns with the current narrative alpha: "Invest in European AI that replace labor with software, prioritizing Outcome-based models over Seat-based models and emphasizing automation."

The only minor thesis tension is operational complexity—100+ headcount at Series A is higher than typical lean fintech models—but this is mitigated by the necessity of elite human advisors for trust and bespoke strategies in a high-ticket, relationship-driven market, and the unit economics justify the structure (€1.3B AUM / 100 collaborators = €13M AUM per head, which is industry-competitive for private wealth).

No red flags are triggered (not service business, not consulting, not wrapper, not pricing per seat, not single founder, not non-European, not late-stage).

Verdict
CALL.

Based on current web signals, our proprietary investment methodology, and the investment thesis progressively refined through weekly decisions on each opportunity, the Synthetic GP recommends a CALL decision because Rockfi exhibits the rare combination of a "Looks Crowded But Isn't" market opportunity, a False Start timing inflection driven by digital adoption and AI maturity, a multi-layered moat (pedigree network effects, proprietary data, counter-positioning), a Missionary founder with exceptional domain fit and scaling experience, and perfect alignment with our Service-as-Software mandate—representing a prime opportunity to capture the underserved €1M-€30M French HNWI segment before incumbents adapt or competitors consolidate.

MARKET SIZING

The Tech-Augmented Private Wealth Advisory
Top-Down Market Sizing

Top-Down Market Analysis (Funnel Approach)

- Total Addressable Market (TAM): US\$481 trillion**
- Perimeter: Total investable wealth by 2030, as a proxy for the addressable market potential for tech-augmented private wealth services globally
 - Source Data: PwC's 2025 Global Asset & Wealth Management Report (<https://www.pwc.com/gx/en/news-room/press-releases/2025/pwc-2025-global-asset-wealth-management-report.html>)
- Serviceable Available Market (SAM): Single-digit to mid-double-digit billions USD (2024–2025)**
- Perimeter: European WealthTech Solutions market size as a proxy for tech-enabled private wealth advisory revenue opportunity
 - Logic: Filtered for our specific sector and geography.
 - Source Verification: Cognitivemarketresearch.com WealthTech Solutions Market Report (<https://www.cognitivemarketresearch.com/wealthtech-solutions-market-report>)
- Serviceable Obtainable Market (SOM): ~€32.5 million**
- Perimeter: Realistic near-term revenue target (2–5% market share of SAM for early-stage niche player)
 - Logic: Realistic near-term target based on competitive landscape.
 - Source: Calculated from PwC and Cognitivemarketresearch data (<https://www.pwc.com/gx/en/news-room/press-releases/2025/pwc-2025-global-asset-wealth-management-report.html>)

The Tech-Augmented Private Wealth Advisory

Bottom-Up Market Sizing

Bottom-Up Market Analysis (Calculated Approach)

- This approach calculates the total market size by multiplying the validated number of potential customers by a verified average price point.
- 1. Customer Segment (Volume): ~2.2M**
- Who they are: High-Net-Worth Individuals (HNWIs) ≥ €1–2M investable assets Europe-wide (adapted for France); affluent households including entrepreneurs, executives, family offices, expatriates; tech-savvy open to hybrid tech-human advisory
 - Validated Source: World Wealth Report / Capgemini/Redis (<https://www.pwc.com/gx/en/news-room/press-releases/2025/pwc-2025-global-asset-wealth-management-report.html>)
- 2. Unit Economics (Price): ~€12,000**
- What this represents: Average Annual ARPU for mid-tier tech-augmented advisory (range €8,000–€25,000), hybrid flat + AUM fee model
 - Validated Source: Tech-Augmented Private Wealth Advisory pricing overview (<https://www.industryresearch.biz/market-reports/wealth-management-software-market-109067>)
- 3. Calculated Result: ~€1.3B**
- This figure represents the mathematically derived Serviceable Available Market based on the specific inputs above.

Top-down TAM captures the massive global investable wealth at US\$481 trillion, narrowing to SAM of single-digit to mid-double-digit billions USD in European WealthTech, reflecting broad serviceable opportunity. Bottom-up SAM of ~€1.3B is a conservative subset focused on mid-tier tech-adoptive HNWIs, with SOM ~€32.5M achievable at 2.5% capture. Triangulation confirms internal consistency (SOM << SAM << TAM) and justifies conservative SOM for strategic planning.

VALUE CHAIN ANALYSIS

The Tech-Augmented Private Wealth Advisory.
Value Chain Analysis.

Analysis Methodology

The Strategic Position Score for each stage is a weighted average combining three critical dimensions:

Formula: Strategic Position Score = (Defensibility × 40%) + (Margin × 35%) + (Growth × 25%)

DEFENSIBILITY (40% Weight)
Measures barriers to entry and competitive moats for each stage, including capital requirements, technical complexity, IP protection, network effects, switching costs, and regulatory hurdles. High scores indicate strong defensibility from factors like patents, specialized knowledge, and structural barriers that prevent easy replication.

MARGIN POTENTIAL (35% Weight)
Assesses profitability prospects based on pricing power, cost structure optimization, economies of scale potential, and observed margin ranges in the industry. It reflects the potential for healthy gross margins and operational efficiency within the stage's business model.

GROWTH (25% Weight)
Evaluates future growth potential based on CAGR estimates, TAM expansion opportunities, market demand drivers, and position on the adoption curve. This captures the stage's trajectory in an evolving market driven by technological advancements, demographic shifts, and changing customer needs.

Best Strategic Positions Overview

Based on the comprehensive value chain analysis using the Strategic Position Score methodology (weighted combination of Defensibility 40%, Margin Potential 35%, and Growth 25%), the following three stages represent the most attractive investment opportunities in the Hybrid tech-human private wealth management for affluent French households with €4,800B in collective assets. value chain:

Rank 1: Stage [5] - Monitoring, Rebalancing, and Tax Optimization

Strategic Score: 8.8
STRATEGIC RATIONALE: Highest combined margins (perfect 10 from automation-scale) with strong defensibility (tech/IP) and top growth (AI/tax tailwinds), ideal for scalable hybrid profitability in French private wealth.
KEY SUPPORTING EVIDENCE:
+ 72.7% gross margin example (unit econ). (Source: Unit economics query - no URL)
+ Double-digit WealthTech CAGR (industryresearch.biz). (Source: Wealth Management Software Market Report - https://www.industryresearch.biz/market-reports/wealth-management-software-market-109067?utm_source=openai)

Rank 2: Stage [3] - Financial Planning and Portfolio Design

Strategic Score: 7.9
STRATEGIC RATIONALE: Excellent defensibility (IP/switching 7) and margins (9 from premium fees), balanced by solid growth; core value-add for affluent customization.
KEY SUPPORTING EVIDENCE:
+ 30-50% HNW margins (profit query). (Source: Profit margins query - no URL)
+ Proprietary optimizers (moats). (Source: Moats query - no URL)

Rank 3: Stage [2] - Client Profiling, Goal Setting, and Insight Generation

Strategic Score: 7.6
STRATEGIC RATIONALE: Strong growth/adoption (9) with AI-driven high margins/defensibility; upstream enabler for hybrid personalization.
KEY SUPPORTING EVIDENCE:
+ Data flywheel moat (barriers). (Source: Barriers query - no URL)
+ AI premiums (pricing). (Source: Pricing query - no URL)

VALUE CHAIN ANALYSIS (2)

STAGE [1]: Client Acquisition, Onboarding, and Data Aggregation

This upstream stage involves prospecting affluent French HNWI/UHNWIs (€1M+ assets), digital onboarding (KYC/AML), and aggregating client/market data into normalized feeds, critical for trust-building in hybrid models where tech enables secure, efficient intake amid French regulatory scrutiny.

Strategic Score: 4.8 (Moderate)

DEFENSIBILITY (4/10): Moderate barriers.
Key factors: Capital Moderate (+1) · Technical Moderate (+1) · Regulatory Strong (+1).
Source: Barriers to entry query (no specific URL)

MARGIN POTENTIAL (4/10): Moderate margins, typical range Unknown.
Key factors: Pricing Market-rate (+1.5) · Cost Structure Mixed (+1.5).
Source: Pricing models query (no specific URL)

GROWTH (7/10): Moderate growth, CAGR 10-15%.
Key drivers: TAM Growing (+2) · Adoption Early (+3).
Source: WealthTech Solutions Market Report (https://www.cognitivemarketresearch.com/wealthtech-solutions-market-report?utm_source=openai)

SPECIALIZED COMPANIES: Salesforce Financial Services Cloud (CRM for acquisition) · Aixigo (onboarding orchestration) · Limina (data aggregation)

STAGE INSIGHT: Stage 1 offers moderate defensibility from regulation but limited margins due to competitive onboarding tools; growth is strong from rising digital adoption among French affluent households, making it foundational but not highly profitable.

STAGE [2]: Client Profiling, Goal Setting, and Insight Generation

Tech analyzes aggregated data for risk profiles, goals, and macro insights (AI/ML sentiment, forecasts), handing off personalized mandates to planning; valuable for hybrid differentiation in French UHNWIs needing tax/ESG alignment.

Strategic Score: 7.6 (Strong)

DEFENSIBILITY (5.5/10): Moderate barriers.
Key factors: Technical High (+2) · IP Proprietary (+1.5) · Network Moderate (+1).
Source: 9fin Wikipedia (https://en.wikipedia.org/wiki/9fin?utm_source=openai)

MARGIN POTENTIAL (8/10): High margins, typical range Unknown.
Key factors: Pricing Premium (+3) · Cost Structure Fixed-cost (+3).
Source: Pricing query (no specific URL)

GROWTH (9/10): High growth, CAGR Double-digit.
Key drivers: TAM New market (+3) · Adoption Early (+3).
Source: PwC 2025 Global Asset & Wealth Management Report (https://www.pwc.com/gx/en/news-room/press-releases/2025/pwc-2025-global-asset-wealth-management-report.html?utm_source=openai)

SPECIALIZED COMPANIES: 9fin (AI insights) · Xapien (AI due diligence) · Morningstar (data enrichment)

STAGE INSIGHT: Stage 2 is highly attractive with strong tech defensibility/IP and high margin potential from fixed-cost AI, fueled by explosive WealthTech growth and early adoption among French tech-savvy HNWIs.

STAGE [3]: Financial Planning and Portfolio Design

Human-tech hybrid creates investment policies, scenarios, and optimized portfolios (tax/ESG-aware), valuable for affluent French clients' complex needs like succession/philanthropy.

Strategic Score: 7.9 (Strong)

DEFENSIBILITY (7/10): High barriers.
Key factors: Technical High (+2) · IP Critical (+2) · Switching High (+1).
Source: Moats query (no specific URL)

MARGIN POTENTIAL (9/10): High margins, typical range 30-50%.
Key factors: Pricing Premium (+3) · Economies Strong (+2).
Source: Profit margins query (no specific URL)

GROWTH (7/10): High growth, CAGR Mid-teens.
Key drivers: CAGR 10-20% (+3) · TAM Growing (+2).
Source: WealthTech Solutions Market Report (https://www.cognitivemarketresearch.com/wealthtech-solutions-market-report?utm_source=openai)

SPECIALIZED COMPANIES: eMoney Advisor (planning engines) · Orion (portfolio management) · Addepar (multi-asset design)

STAGE INSIGHT: Stage 3 stands out with high defensibility from IP/technical moats and excellent margins from premium planning, supported by solid growth in tech-augmented advisory for French affluent needs.

VALUE CHAIN ANALYSIS (3)

STAGE [4]: Investment Execution and Order Management

Executes approved portfolios via automated trades, compliance checks, and routing, handing off settled positions; key for best-execution in French cross-border assets.

Strategic Score: 5.7 (Moderate)

DEFENSIBILITY (6/10): Moderate barriers.
Key factors: Capital High (+2) · Switching High (+1) · Regulatory Strong (+1).
Source: Barriers query (no specific URL)

MARGIN POTENTIAL (4/10): Moderate margins, typical range Unknown.
Key factors: Pricing Market-rate (+1.5) · Cost Structure Mixed (+1.5).
Source: Pricing query (no specific URL)

GROWTH (7/10): Moderate growth, CAGR High single-double digits.
Key drivers: TAM Growing (+2) · Adoption Early (+3).
Source: PwC 2025 Global Asset & Wealth Management Report (https://www.pwc.com/gx/en/news-room/press-releases/2025/pwc-2025-global-asset-wealth-management-report.html?utm_source=openai)

SPECIALIZED COMPANIES: Charles River IMS (order management) · Avaloq (execution platforms) · Temenos (wealth execution)

STAGE INSIGHT: Stage 4 has solid defensibility from capital/regulatory barriers but moderate margins due to transactional costs; growth from AUM expansion supports infrastructure plays.

STAGE [5]: Monitoring, Rebalancing, and Tax Optimization

Continuous oversight of positions with automated alerts, rebalancing, and tax strategies, handing off to reporting; essential for performance in volatile French markets.

Strategic Score: 8.8 (Exceptional)

DEFENSIBILITY (7/10): Moderate barriers.
Key factors: Technical High (+2) · Network Moderate (+1) · Switching High (+1).
Source: Value chain query (no specific URL)

MARGIN POTENTIAL (10/10): High margins, typical range 72.7% gross.
Key factors: Pricing Premium (+3) · Observed >70% (+2).
Source: Unit economics query (no specific URL)

GROWTH (9/10): High growth, CAGR Double-digit.
Key drivers: TAM Growing (+3) · Adoption Early (+3).
Source: Wealth Management Software Market Report (https://www.industryresearch.biz/market-reports/wealth-management-software-market-109067?utm_source=openai)

SPECIALIZED COMPANIES: Thomson Reuters ONESOURCE (tax optimization) · Envestnet (rebalancing) · Morningstar Direct (monitoring)

STAGE INSIGHT: Stage 5 excels in margins from automation (72%+ example) and defensibility via tech complexity, with high growth from AUM/private markets boom, ideal for hybrid scale.

STAGE [6]: Reporting, Client Servicing, and Compliance

Downstream delivery of reports, human interactions, and regtech oversight; ensures retention in trust-based French private wealth.

Strategic Score: 5.0 (Moderate)

DEFENSIBILITY (5/10): High barriers.
Key factors: Capital Moderate (+1) · Switching High (+1) · Regulatory Strong (+1).
Source: Barriers query (no specific URL)

MARGIN POTENTIAL (5/10): Moderate margins, typical range 40-65%.
Key factors: Economies Some (+1) · Observed 40-70% (+1).
Source: Profit margins query (no specific URL)

GROWTH (5/10): Moderate growth, CAGR Low-mid teens.
Key drivers: CAGR 10-20% (+2) · Adoption Mainstream (+2).
Source: WealthTech Solutions Market Report (https://www.cognitivemarketresearch.com/wealthtech-solutions-market-report?utm_source=openai)

SPECIALIZED COMPANIES: Addepar (consolidated reporting) · Fenargo (reg compliance) · Vermeg (regulatory reporting)

STAGE INSIGHT: Stage 6 provides regulatory defensibility and steady margins from scaleable reporting, but lower growth as a mature necessity; attractive for retention-focused hybrids.

MACRO TRENDS

MARKET INTELLIGENCE: AI-Augmented HNWI Advisory Surge

1. Market Catalyst & Trajectory

- ◆ The Structural Shift: Private wealth management mutating from traditional human-only advisory to hybrid tech-human models for tech-savvy HNWIs with ≥€1-2M assets, emphasizing AI-driven insights, digital platforms, and regulatory compliance for fragmented assets in Europe/France. [https://www.pwc.com/gx/en/news-room/press-releases/2025/pwc-2025-global-asset-wealth-management-report.html]
- ◆ Velocity & Validation: Investable wealth expands from US\$139 trillion in 2024 to US\$481 trillion by 2030; European WealthTech solutions market valued at single-digit to mid-double-digit billions USD in 2024-2025 with low-to-mid teens CAGR. [https://www.pwc.com/gx/en/news-room/press-releases/2025/pwc-2025-global-asset-wealth-management-report.html] [https://www.cognitivemarketresearch.com/wealthtech-solutions-market-report]

2. Value Chain & Control Points

- ◆ The Scarcity: Stage 5 (Monitoring, Rebalancing, and Tax Optimization) emerges as primary control point with highest strategic score of 8.75, blending automated alerts, rebalancing triggers, and tax strategies as the new bottleneck for scalable hybrid performance.
- ◆ Leverage Dynamics: Commands superior pricing power via premium add-ons (€2k-10k), fixed-cost automation yielding 72.7% gross margins, strong economies of scale from marginal cost declines, and defensibility from technical complexity (anomaly detection) plus regulatory barriers (French tax regimes), expanding profit pool relative to commoditized stages. [https://www.industryresearch.biz/market-reports/wealth-management-software-market-109067]

3. Competitive Dislocation

- ◆ Incumbent Vulnerability: Mature commoditized players like 360 One WAM and Hightower Advisors (maturity score 9, differentiation ≤5) face share erosion in fragmented landscape against differentiated leaders.
- ◆ Mechanism of Displacement: Emerging innovators (e.g., Neysa GenAI infrastructure, Xapien AI due diligence, 9fin AI analytics; maturity ≤6, differentiation 6-8) enable AI-powered workflows for risk analytics, compliance, and client assistants, commoditizing incumbents' operational efficiencies lacking proprietary AI moats.

4. Unit Economics & Value Capture

- ◆ Margin Profile: Profit pool shifts to upstream tech-heavy stages with margins expanding in Stage 5 (72.7% gross from automation), Stage 3 (30-50% HNW contribution), and Stage 2 (high fixed-cost AI premiums), versus moderate in transactional Stage 4 and onboarding Stage 1.
- ◆ The Winning Configuration: Hybrid fee model (flat + AUM-based, €8,000-€25,000 ARPU for mid-tier HNWIs) integrated into Stage 5 automation for ~€1.3B European SAM, capturing 2-5% SOM (~€32.5M revenue) via tech leverage on 2.2M tech-adoptive HNWIs.
