

INTELLIGENT AI-DRIVEN TRADING AND INVESTMENT MANAGEMENT GENERATING STABLE DAILY RETURNS.

- DeFi (Decentralized Finance) > AI Crypto Yield Automation Platform
- B2C > Multi-Level Marketing (MLM)

WEIGHTED SCORE CALCULATION
Thesis : Profund

TEAM EXCELLENCE 10/100 × 15% = 1.5 points
MARKET OPPORTUNITY 20/100 × 15% = 3.0 points
PRODUCT INNOVATION 10/100 × 15% = 1.5 points
BUSINESS MODEL 5/100 × 25% = 1.25 points
TRACTION & GROWTH 15/100 × 30% = 4.5 points

Base Score: 11.75/100
Thesis Alignment Modifier: -10%

FINAL ADJUSTED SCORE: 1.75/100 → POOR (<60)

? In a NUTSHELL : Neutys is a AI Crypto Yield Automation Platform that enables retail crypto investors to generate passive income by automating trading across Web3 and Metaverse assets.

! THE PROBLEM : Retail investors lack the technical expertise and time to actively trade high-volatility Web3 assets (NFTs, GameFi) and often miss out on yield opportunities due to market complexity.

✓ THE SOLUTION : The platform provides an AI-driven dashboard and automated trading algorithms that promise daily returns (2.2% to 4.5%) with automated reinvestment. Their non-consensus insight is that retail users value 'stable' daily returns over long-term capital appreciation in the volatile crypto space.

🚀 THE GTM & MOAT : Their primary GTM motion is a 7-level deep affiliate marketing program. Long-term defensibility is claimed through proprietary 'AI risk minimization algorithms,' though there is no evidence of a structural data moat.

☹️ Our RATIONALE & THESIS FIT on this company :
FATAL GATE HIT: The business model functions as a High-Yield Investment Program (HYIP) with an MLM-based distribution layer, which is a direct exclusion for institutional venture capital.
The company operates in an unregulated/low-friction retail segment, completely deviating from the thesis focus on 'high-friction industries' like Tax or Healthcare. There is zero alignment with the 'Service-as-Software' or 'System of Record' mandate as Neutys is a financial utility tool with significant reputational and regulatory risk.

👤 TEAM EXCELLENCE (15%) | Score: 10/100
◆ Founder-Market Fit (10/25): Pierre Shosola-Unyumbi · Professional background lacks deep-tier engineering or tier-1 financial institutional track record.
◆ Track Record (5/25): No visible history of building venture-scale technology companies.
◆ Leadership (10/25): Team size is estimated at ~7, mostly focused on general management and operations rather than R&D.
◆ Completeness (15/25): Basic functional roles exist, but lack of academic or high-tech pedigree (e.g., Google, DeepMind).

🌊 MARKET OPPORTUNITY (15%) | Score: 20/100
◆ Size & Growth (20/25): TAM for retail crypto yield is billions, but the specific 'guaranteed return' segment is a shrinking, toxic subset.
◆ Timing Why Now (15/25): Transition to Web3 analytics is timely, but the HYIP model is counter-trend to current regulatory tightening.
◆ Competition (15/25): Competing against established, regulated giants like SwissBorg and DeFi protocols like Yearn.
◆ Expansion (10/25): Limited. Models based on high-depth affiliates face local regulatory bans (e.g., SEC, FCA).

💡 PRODUCT INNOVATION (15%) | Score: 10/100
◆ Differentiation (5/25): Promising 2.2%+ daily returns is a red flag, not a technological differentiation.
◆ Product-Market Fit (15/25): Real-time transaction feed shows some activity, but the 'fit' is likely for yield-chasers rather than sustainable investors.
◆ Scalability (10/25): MLM models scale fast but are fragile; the architecture is a standard web dashboard.
◆ IP & Barriers (5/25): No visible patents or proprietary foundation models.

💼 BUSINESS MODEL (25%) | Score: 5/100
◆ Unit Economics (5/25): Unsustainable. Paying 29% in affiliate commissions + 2.2% daily returns is mathematically predatory.
◆ Revenue Model (5/25): HYIP/SaaS management fee. Not a true SaaS or Service-as-Software model.
◆ Monetization (5/25): Based on capital deposits rather than value creation or outcome-based labor.
◆ Capital Efficiency (10/25): Bootstrap/Affiliate-funded; no institutional rounds.

📈 TRACTION & GROWTH (30%) | Score: 15/100
◆ Revenue Growth (15/25): Claims of 1,827 investors, but unverifiable on-chain.
◆ Customer Validation (10/25): Testimonials are generic; media mentions appear to be paid press releases (Newswire).
◆ KPI Progression (15/25): Launched in 2026; too early for sustained growth metrics.
◆ Market Penetration (10/25): Focused on high-yield crypto niche.

NEUTYS'S EXECUTIVE SUMMARY (2)

🔑 KEY COMPETITIVE ADVANTAGES:

- ◆ Low entry barrier (\$0.10 minimum for some assets) to capture low-tier retail.
- ◆ High-velocity affiliate program (7-levels) for rapid customer acquisition.
- ◆ Multi-chain support (TRC20, BEP20, TON, etc.) for accessibility.
- ◆ Simplified UX for complex Web3 yields.
- ◆ Real-time investor dashboard for feedback loops.

🚧 MOAT: WEAK

- ◆ Brand Moat: Non-existent. The company faces significant trust issues and 'scam' warnings on independent review sites.
- ◆ Technology Moat: Transparently weak. Automated trading bots are commoditized; the returns claimed are statistically impossible without a Ponzi structure.

🚩 RED FLAGS

- ◆ Universal Red Flags: Promising fixed daily returns of 2.2% to 4.5% is the hallmark of unsustainable financial schemes. High affiliate commission (29% total) indicates capital gathering as the primary objective over tech building.
- ◆ Thesis-Specific Red Flags: Direct violation of the 'no utility tools' and 'no selling access' exclusions. Neutys does not own a proprietary 'Authoring Layer' or solve an industry challenge in a regulated European sector; it is a retail yield wrapper.

📋 FIRST MEETING PREP KIT

- ◆ The Investment Angle: The core bet is that Neutys is actually a sophisticated analytics engine masquerading as a yield platform to gather data, but evidence suggests it is purely a retail-focused investment scheme.
- ◆ Killer Questions for First Call:
 - Question 1 : Can you provide audited on-chain proof of the AI's trading activity and how it sustains 2.2% daily returns during a market downturn?
 - Question 2 : Given the Luxembourg address, what specific CSSF licenses do you hold for collective investment management or crypto asset services?
 - Question 3 : How does your platform transition from a retail 'utility tool' to the 'System of Record' for institutional digital labor?
- ◆ First Meeting Go/No-Go Signal: A 'No-Go' is confirmed immediately upon the mention that returns are paid out of new member deposits or if no verifiable securities/VASP licensing is presented.

📊 THESIS ALIGNMENT SCORE MODIFIER

Fatal Mismatch (-10%): The company is a retail crypto HYIP/MLM, which is the antithesis of our mission to back enterprise-grade, high-friction AI systems of record. It fails every strategic gate in the ProFund Investment OS.

🌐 DATA CONFIDENCE : LOW

- ◆ Verify the actual trading desk activity and technical depth of the 'Quant Developer' role.
- ◆ DATA GAPS : Audited financial statements • Regulatory status verification • On-chain transparency of 'Reserve Funds' • Founder background verification beyond own website.

VALUE PROPOSITION

Value Proposition:
Intelligent AI-driven trading and investment management generating stable daily returns across Web3, NFT, GameFi, and Metaverse sectors. AI-driven Web3 analytics ecosystem designed for real-time analytics across NFT marketplaces, GameFi, metaverse projects, and other blockchain assets. AI-integrated data processing, real-time dashboards, and risk-monitoring features.

Non-consensus insight that retail users value 'stable' daily returns over long-term capital appreciation in the volatile crypto space.

Ideal Customer Profile (ICP):
Retail and institutional crypto investors seeking automated yield and passive income through diversified blockchain assets. Retail investors lacking technical expertise and time to actively trade high-volatility Web3 assets (NFTs, GameFi). Yield-chasers rather than sustainable investors. Low-tier retail with low entry barrier (\$0.10 minimum for some assets).

B2B or B2C:
B2C - Individual investors joining an automated platform. B2C > Multi-Level Marketing (MLM).

Industry:
FinTech / Crypto Investment. DeFi (Decentralized Finance) > AI Crypto Yield Automation Platform. Retail DeFi and automated wealth management. Crypto Asset Management space.

Contact & Legal:
Entity Name: Neutys. Founded: Approx. late 2025. Launched in 2026. HQ: Bertrange, Luxembourg. `hq_country`: Luxembourg. Telegram: `t.me/channel_neutys_net`. Website: `https://neutys.net`.

Mentions licensed operations and official registration without specific legal entity details provided. CSSF licenses not specified.

Key Client Examples & Testimonials:
1,827 investors. Over 200 media outlet mentions. Real-time transaction feed showing users like Ale***, Lan***, and Qia***. Testimonials are generic; media mentions appear to be paid press releases (Newswire).

PRODUCT FEATURES

Core Solution:
An AI-driven capital allocation platform that automates trading in liquid crypto assets and Web3 projects. Website where you give them your digital money (crypto), and they use computer programs to trade it in the market promising small profit every single day. AI-driven investment management with automated yield generation. Web3 Intelligence Ecosystem for Decentralized Market Analytics.

Feature Encyclopedia:
AI-Driven Investment Management | Real-time AI Dashboard | Transparent Reporting | Automated Reinvestment (Compound Interest) | Risk Minimization Algorithms | Lightning-fast Processing | Institutional-grade Security | Adaptive Trading Algorithms | Real-time investor dashboard for feedback loops | Simplified UX for complex Web3 yields.

Technical Capabilities:
API Infrastructure | 2FA Security | Multi-chain support (TRC20, BEP20, POL, TON, ERC20) | Web-based Investor Dashboard.

Use Cases:
Automated daily yield generation | Portfolio diversification into Metaverse/GameFi | Passive crypto asset growth | Automating trading across Web3 and Metaverse assets | Generate passive income by automating trading across Web3 and Metaverse assets.

BUSINESS MODEL AND PRICING

Business Model Analysis:

High-Yield Investment Program (HYIP) / SaaS Management. High-Yield Investment Program (HYIP) / Multi-Level Marketing (MLM). Paying 29% in affiliate commissions + 2.2% daily returns.

Based on capital deposits rather than value creation or outcome-based labor. Bootstrap/Affiliate-funded; no institutional rounds.

Revenue Streams & Pricing Tiers:

Trader Invest Line: 2.2% Daily (15 days) | 3.5% Daily (30 days). Whale Invest Line: 3.0% Daily (40 days) | 4.5% Daily (50 days). Affiliate Program: 7-level deep commissions up to 29% total.

Plan Features:

Base plan (2.2%) offers 33% net profit | Pro plans offer up to 225% net profit. Minimum entry varies by currency (e.g., \$0.10 for TRX/DOGE/BNB up to \$30 for BTC). Tiered investment lines with varying daily yield.

Hidden Costs & Terms:

Commissions are stated as already deducted from capital | withdrawal minimums apply (e.g., \$30 BTC, \$1 LTC, \$0.10 TRX). Unsupported unit economics.

TEAM & COMPANY CULTURE

Company Culture:

Data-driven, transparent, and focused on the future of digital reality and smart investments.

Team Analysis:

Pierre Shosola-Unyumbi (CEO - General Management and development strategy), Jeffrey Frank (CFO - Capital Management), Juanita Bailey (Chief Risk Officer), Andrew West (Head of Trading), Michael Rhodes (Trader), Leona Park (Quant Developer).

Job Offers & Titles:

None specifically listed; focuses on affiliate partner growth.

Estimated Headcount:

- Product & Engineering: 2
- Marketing: 1
- Sales: 1
- Support & IT: 1
- General & Admin (G&A): 2

Team size estimated at ~7, mostly focused on general management and operations rather than R&D.

NEUTYS's SWOT ANALYSIS

STRENGHTS	WEAKNESSES
AI branding in hyped Web3/NFT/GameFi sectors Multi-chain support (TRC20,BEP20,ERC20 etc.) for broad accessibility Affiliate program with deep 7-level commissions driving viral growth Recent GlobeNewswire press release validating launch 1,827 investors and real-time transaction feed signaling traction	Unsustainable HYIP model promising 2.2-4.5% daily returns (classic Ponzi) Opaque team credentials; empty CEO LinkedIn and unverified backgrounds Vague legal claims (Luxembourg entity, no filings or licenses detailed) Scam warnings on third-party sites eroding trust No funding history, M&A, or external growth strategy disclosed
OPPORTUNITIES	THREATS
Crypto bull market fueling retail yield hunger AI-Web3 analytics hype from recent ecosystem launch Passive income demand in volatile metaverse/GameFi assets Affiliate scalability into emerging markets Potential regulatory tailwinds for compliant platforms	Regulatory crackdown on unregistered HYIPs in EU/Luxembourg Market downturn triggering mass withdrawals and collapse Competition from legit AI trading firms (e.g., 3Commas, legit DEX aggregators) User backlash from inevitable payout failures Hacks/exploits on multi-chain infrastructure without proven security track record
ACTION PLAN	
How to defend? Fortify with institutional-grade security and multi-chain diversification to withstand hacks and short-term volatility. How to win? Hyper-scale via affiliates and AI-Web3 hype to onboard retail before saturation, capturing bull market FOMO in GameFi/metaverse yields. What would be fatal? Mass withdrawals in bear market exposing Ponzi math, combined with Luxembourg regulators freezing assets. What to fix? Validate team creds, disclose licenses, pivot from HYIP to sustainable fees to unlock institutional capital.	

CONVICTION FROM AN AI GENERAL PARTNER ON NEUTYS

 Synthetic GP Conviction (summary):

Market
Retail crypto yield automation masked as a niche AI play; fundamentally unstable and institutionally avoided.

Timing
Bad Boomerang timing; leveraging AI hype to revive unsustainable high-yield models in a hostile regulatory era.

Company
Unsustainable MLM-driven distribution with zero technological moat or proprietary data flywheel.

Founder
No domain-specific pedigree; focused on retail capital gathering rather than Missionary tech-building.

Thesis-fit
Hard Block; violates sector, geography, and business model exclusions of the ProFund OS.

Verdict
PASS: Toxic retail scheme with zero synergy and high regulatory risk.

 Synthetic GP Conviction:

Market
The market for retail crypto yield automation is a Seems Niche segment that is actually a subset of Too Personally Unfamiliar, as institutional investors avoid the inherent instability and regulatory toxicity of high-yield promises. Much like Friendster failed to provide the structural persistence needed for a social graph, this model lacks the durability required for a financial system of record.

Timing
This investment represents a Boomerang, defined as the return of a previously failed idea that still lacks the necessary regulatory environment to succeed, despite the catalyst of AI-integrated marketing. While the catalyst of New Technology (LLMs) provides a fresh wrapper, the underlying mechanism remains a high-yield retail trap operating against a tightening regulatory wind.

Company
The company lacks a technical moat, instead relying on a distribution hack via a 7-level deep Multi-Level Marketing (MLM) program that pays out unsustainable 29% commissions. **M&A SYNERGY:** The synergy analysis confirms that an acquisition would be catastrophic, as the business model functions as a High-Yield Investment Program (HYIP) which creates immediate regulatory exposure and zero strategic overlap with high-friction enterprise AI labor.

Founder
The leadership appears to be a Mercenary team rather than deep-tech Missionaries, lacking any tier-1 financial or engineering pedigree required to build a legitimate AI-native financial infrastructure. They have not scratched a domain-expert itch but have instead optimized for rapid capital gathering from low-tier retail investors.

Thesis-fit
This opportunity fails every primary Binary Gate, specifically the Sector exclusion for low-friction/unregulated industries and the Business Model exclusion for capital-deposit-based monetization. It triggers numerous Semantic Filter Red Flags including Utility Tool and MLM, while showing zero alignment with Narrative Alpha goals for digital labor in high-friction European industries.

Verdict
PASS: The target is a toxic financial architecture that poses an existential reputational risk to any legitimate institutional portfolio.

 SYNERGY_BLOCK_SIGNAL: Rejected because M&A synergies are WEAK_SYNERGY: Redundant and illegal retail model. NARRATIVE_INSIGHT: Neutys is a retail-focused HYIP scheme that violates all ProFund safety and sector parameters.
