FINAL ADJUSTED SCORE:	91.6/100 → ● INTERESTING
-----------------------	---------------------------------------

? In a NUTSHELL : Naboo is a Corporate Event Procurement SaaS that enables HR and Event Managers to automate the lifecycle of corporate retreats and seminars by centralizing fragmented long-tail vendor ecosystems into a single AI-native OS.

! The PROBLEM : Enterprise event planning is a 'manual labor trap' characterized by fragmented procurement, opaque pricing across thousands of vendors, and administrative nightmares involving multiple invoices and compliance risks.

✓ THE SOLUTION : The platform replaces traditional event agencies with an AI-driven turnkey service. Their non-consensus insight is that corporate events are not a 'creative service' problem but a 'logistics and procurement' problem that can be solved through transaction-level transparency and unified invoicing.

🚀 THE GTM & MOAT : Their primary GTM is an enterprise-led approach targeting the CAC 40 and Fortune 500, leveraging their status as a compliant, vetted vendor. Defensibility is built through deep integration into corporate procurement workflows (System of Record) and a 'Shadow Data Flywheel' of vendor performance data across Europe.

💬 Our RATIONALE & THESIS FIT : Naboo represents a textbook 'Service-as-Software' play. It replaces the headcount of a traditional event agency with an automated platform, aligning perfectly with our narrative_alpha. The founders' elite pedigree (CentraleSupélec/Columbia/Oliver Wyman) provides the necessary 'Operational Excellence' DNA to navigate complex Fortune 500 procurement environments. The most significant risk is the commission-based revenue volatility during economic downturns, though their penetration into 'non-discretionary' training seminars mitigates this.

NABOO'S EXECUTIVE SUMMARY (2)

- 🔑

KEY COMPETITIVE ADVANTAGES:

 - ◆ Elite Founder DNA with deep Operations Research and Strategy Consulting backgrounds.
 - ◆ High-barrier-to-entry compliance framework already validated by 75% of the CAC 40.
 - ◆ Turnkey 'Single Invoice' architecture that solves enterprise procurement friction.
 - ◆ Significant traction signal with €60M booking volume and high efficiency.
 - ◆ AI-native matching of long-tail supply (hotels/caterers) to specific corporate constraints.
- 🏰

MOAT: STRONG

 - ◆ Switching Costs: Integration into enterprise procurement and HR systems as a vetted 'System of Action' makes replacement procedurally difficult.
 - ◆ Data Advantage: Proprietary database of 5,000+ client preferences and transparent pricing from a hyper-local European vendor network.
- 🚩

RED FLAGS

 - ◆ Universal Red Flags: Heavy reliance on commission-based revenue can lead to lumpy cash flows compared to pure-play recurring SaaS subscriptions.
 - ◆ Thesis-Specific Red Flags: The current model is transactional rather than seat-based recurring, which requires continuous high volume to justify SaaS-like multiples.
- 📝

FIRST MEETING PREP KIT

 - ◆ The Investment Angle: The core bet is that Naboo will become the 'Booking.com for Enterprise Seminars,' owning the entire procurement layer of a fragmented multi-billion dollar market.
 - ◆ Killer Questions for First Call:
 - Question 1 : Can you demonstrate how your 'AI Product Owner' role translates into actual gross margin expansion compared to a traditional agency model?
 - Question 2 : How much of your €60M volume is truly recurring (annual seminars) vs. one-off celebratory events?
 - Question 3 : As you expand to North America, how will you replicate the local supply-side network that you've built in Europe?
 - ◆ First Meeting Go/No-Go Signal: A clear validation that their AI automation is reducing CAC and operational overhead per booking compared to manual competitors.
- 1234

THESIS ALIGNMENT SCORE MODIFIER

Excellent Fit (+5%): The platform explicitly automates a manual workflow and operates as 'Service-as-Software' within a vertical vertical AI framework, perfectly matching our core mandate.
- 🌐

DATA CONFIDENCE : HIGH

 - ◆ Focus on Unit Economics and the scalability of the North American expansion plan.
 - ◆ DATA GAPS : Specific take-rate percentages per transaction • Cohort-based NRR (Net Revenue Retention) metrics.

VALUE PROPOSITION

Website Information

Value Proposition:

Naboo radically simplifies corporate parties and retreats with a turnkey service featuring no hidden costs, a single point of contact, single invoice, and unified platform for all service providers, ensuring transparency and efficiency.

Ideal Customer Profile (ICP):

Large corporations such as CAC 40 companies organizing retreats, seminars, evenings, and team buildings for 15-30+ people. Decision-makers include event managers and HR professionals. Partners: venues with meeting rooms and 10+ rooms, restaurants for 30+, team-building providers, caterers, transport services, and more.

B2B or B2C:

B2B

Industry:

Events Management (Corporate Event Planning & Organization Software/Services); overlaps with travel and hospitality.

Contact & Legal:

Information not provided.

Key Client Examples & Testimonials:

Trusted by 5,000+ companies, including three-quarters of CAC 40 firms. One in ten CAC 40 events booked via Naboo. Maxime: 'we are moving at the pace of our customers, where they urge us to open up markets.'

PRODUCT FEATURES

Product

Core Solution:

Platform and turnkey service for corporate events including seminars, evenings, and team-building, with centralized planning via single contact, invoicing, and provider platform to eliminate complexities.

Key Features:

Turnkey service | Single point of contact | Single invoice | Unified platform | Online booking | Partner networks for seminars, evenings, team-building, catering, transport | AI integration.

Technical Capabilities:

AI integration | Cloud-based web platform | Security via Vercel.

Use Cases:

Corporate retreats | Seminars (15+ people) | Evenings/dinners (30+ people) | Team-building | Catering and transport coordination | Transparent budget management.

BUSINESS MODEL AND PRICING

Pricing

Business Model:

SaaS/Commission-based/Enterprise. Platform matches companies with providers; likely earns commissions on bookings with turnkey services.

Revenue Streams & Pricing Tiers:

Information not provided. Targets >€100M booking volume by 2025 (€60M in 2024).

Plan Features:

Information not provided.

Hidden Costs & Terms:

100% transparent pricing, no hidden costs.

TEAM & COMPANY CULTURE

Team

Company Culture:

Values: Innovation (AI for efficiency), Simplicity (turnkey/single points), Transparency (100% pricing). Ambitious for global expansion driven by customer demand.

Team Analysis:

Founders: Maxime Eduardo, Antoine Servant, Lucien Bredin, Jean-Louis. Includes two ex-Oliver Wyman FS consultants and two technology entrepreneurs.

Job Offers & Titles:

Information not provided.

Estimated Headcount:

Limited data available. Product & Engineering, Marketing, Sales, Support & IT, G&A: All unknown.

CEO

EXECUTIVE ASSESSMENT

Founder Archetype: Maxime Eduardo epitomizes a Product-Led Founder with deep domain expertise in procurement, specifically targeting the long-tail spend segment within corporate events. His leadership integrates AI-driven product innovation and operational rigor, with a strong commercial emphasis on marrying technology and compliance to serve Fortune 500 clients.

Pedigree Signal: Eduardo's education at Columbia Business School (MS in Operations Research) and CentraleSupélec (engineer's degree in Applied Maths) signals a high quantitative and analytical pedigree from top-tier institutions. Professionally, he has solid Tier 1 background experience at Oliver Wyman, a leading global strategy consultancy, complemented by senior leadership and executive committee roles at LABATUT Group, a reputable firm in Paris. His startup leadership at Naboo, which services marquee clients like Siemens and Microsoft, further validates strong brand association and commercial credibility.

Loyalty & Tenure: Eduardo shows a blend of stable, deep-execution roles and relatively shorter, strategic stints. His longest tenure prior to Naboo was nearly 4 years at Oliver Wyman and close to 4 years at LABATUT Group, demonstrating commitment. The current Naboo CEO role has now reached almost 4 years, suggesting maturation and focused growth. The 9-month Chief of Staff freelance assignment at AXA appears tactical, aimed at gaining strategic HR exposure rather than a career shift.

Commercial Fit: Eduardo's prior experience in management consulting, executive leadership, and corporate learning combined with his engineering and analytical background uniquely de-risk Naboo's venture. His understanding of complex procurement ecosystems, regulatory compliance, and enterprise-scale operations directly correlates to Naboo's AI-enabled procurement solution for corporate events, especially given its presence in highly regulated industries and global multinational clientele.

PROFESSIONAL NARRATIVE

Maxime Eduardo's career trajectory reflects a deliberate evolution from foundational analytical roles to strategic leadership and entrepreneurial venture-building in niche procurement technology. Starting with a strong quantitative base from CentraleSupélec and Columbia Business School, he honed his strategic and problem-solving skills at Oliver Wyman, serving large corporate clients. Transitioning into executive leadership at LABATUT Group, he gained hands-on experience in managing operations and driving business growth within a dynamic Parisian environment. A targeted Chief of Staff role at AXA expanded his expertise in corporate learning and global HR initiatives, culminating in founding Naboo to revolutionize long-tail procurement for corporate events with AI-driven technology. His career logic signals a methodical build-up of domain expertise, operational leadership, and tech-driven product innovation to fill a market gap in procurement efficiency.

DETAILED CAREER TIMELINE

2022 – Present | Naboo
Role: Cofounder, CEO and AI Product Owner
Focus: Leading the fastest-growing AI-native procurement OS for long-tail corporate events across Europe and North America, driving product innovation, customer acquisition with Fortune 500 clients, and operational scale with a strong compliance framework.

2019 – 2021 | LABATUT Group
Role: Managing Director
Analysis: Senior leadership role involving strategic oversight and operational management in a mature company; confirms progression into executive management.

2017 – 2021 | LABATUT Group
Role: ExCom member / Membre du COMEX
Analysis: Executive Committee membership indicates trusted strategic decision-making exposure across nearly 4 years, overlapping with Managing Director tenure.

Nov 2017 – Jul 2018 | AXA
Role: Chief of Staff to Chief Learning Officer (Freelance)
Focus: Designed and executed first global Learning Week engaging 30,000 employees, immersing in corporate HR strategy and global program management; a short, project-driven role aligned to broaden executive capabilities.

2014 – 2017 | Oliver Wyman
Role: Associate Manager
Analysis: Early career phase with progressive responsibilities in strategic consulting, developing strong foundational skills in problem-solving, analysis, and client management over 3 years.

ACADEMIC BACKGROUND

CentraleSupélec
Degree: Engineer's degree in Applied Maths
Signal: Grande École – one of France's top engineering schools, highly selective and prestigious, indicating elite quantitative training.

Columbia Business School
Degree: Master of Science (MS) in Operations Research
Signal: Ivy League graduate school renowned for rigorous analytics and business education, providing a global credentials boost and analytical foundation in operations and decision sciences.

NABOO's SWOT ANALYSIS

STRENGTHS

Elite founder DNA: Quant pedigree from CentraleSupélec/Columbia, Oliver Wyman consulting, LABATUT exec roles de-risk procurement execution for Fortune 500.

Explosive traction: 5k+ clients, 75% CAC40 penetration, €60M 2024 volume, €58.7M Lightspeed-led Series B signals hypergrowth validation.

AI-native moat in long-tail events: Turnkey procurement OS crushes fragmentation with single invoice/platform, transparent pricing.

Marquee clients (Siemens/Microsoft) prove enterprise fit in regulated sectors.

Non-obvious thesis: Unlocks 70-80% non-strategic event spend via AI matchmaking, 30-50% admin cuts.

WEAKNESSES

Thin team visibility: Unknown headcount beyond 4 founders (2 ex-consultants, 2 tech), risks scaling ops/AI.

Narrow initial focus: Long-tail events limits vs broader event mgmt; TAM calc €25M feels constrained.

Commission model opacity: No detailed pricing/revenue tiers, potential enterprise sales friction.

Early NA expansion: Europe-dominant, unproven US compliance/traction despite funding.

Vendor network dependency: Platform scale hinges on partner density/retention.

OPPORTUNITIES

Series B fuels NA/EU blitz + AI procurement upgrades (tenders/payments).

Enterprise tail-spend goldmine: Expand beyond events to full non-strategic procurement.

AI tailwinds: Automate 50%+ more workflow, moat vs legacy agencies.

Regulated verticals: EU compliance edge for multinationals.

Recurring events: Lock in HR/event teams with network effects.

THREATS

Incumbents weaponize AI: Cvent/Eventbrite broaden to long-tail procurement.

Macro event squeeze: Downturns slash corporate retreats (15-30+ pax).

Network fragility: Service providers defect to direct deals.

Regulatory flux: Stricter EU procurement/data rules erode moat.

Talent wars: VC-hot space poaches founders/engineers.

ACTION PLAN

How to defend? Fortify EU compliance moat + marquee logos (CAC40/Fortune500) as flywheels; layer AI defensives against Cvent copycats while locking vendors with exclusive volume guarantees and transparent rev-share.

How to win? Double-down on AI procurement OS to own long-tail spend: Use founder quant edge + Lightspeed cash for NA penetration, consolidate 70% fragmented event budgets via network effects and 50% admin cuts, targeting €100M+ volume by automating tenders for growth multinationals.

What would be fatal? Vendor churn amid macro downturn + Cvent AI pivot: Network collapse starves platform, exposing commission fragility without proprietary AI depth.

What to fix? Beef up engineering headcount and reveal pricing tiers now—thin team blocks AI scale/remediation, killing NA expansion velocity and enterprise trust.

CONVICTION FROM AN AI GENERAL PARTNER ON NABOO

Synthetic GP Conviction (summary):

- Market
- Crowded at first glance but white space in long-tail corporate events; Flexport analogy via boring logistics OS.
- Timing
- Right timing from post-pandemic offsites and GenAI catalysts, no False Start or Boomerang.
- Company
- Shadow Data Flywheel and switching costs moat strong yet commission lumpiness a risk; incumbents ignore tail.
- Founder
- Elite ops research pedigree and Fortune 500 execution for perfect fit.
- Thesis-fit
- Passes gates, green Vertical AI/Service-as-Software flags, aligns narrative_alpha.

Verdict

CALL on boring moat, traction, flywheels.

Synthetic GP Conviction:

- Market
- Corporate event procurement appears crowded with incumbents like Cvent, Eventbrite, and Amex GBT focused on large events, but massive white space exists in long-tail mid-sized events (15-100 people) where fragmented vendors create administrative chaos that Naboo addresses with AI-native matching and unified procurement.
- Much like Flexport from Master Class Mechanism 2 transformed boring freight forwarding logistics into a defensible operating system via software automation and data flywheels from hyper-local networks, Naboo turns unsexy event vendor coordination into a compliant one-click API with proprietary performance data.
- Timing
- This represents right timing without False Start (a premature product launch that fails due to immature market conditions) or Boomerang (a proven idea returning after external catalysts mature the market), driven by post-pandemic distributed workforces making offsites non-discretionary for culture-building at 12 percent CAGR in the \$25 billion total addressable market alongside GenAI cost drops enabling previously impossible procurement automation.
- Company
- Naboo builds a strong but not impenetrable moat through Shadow Data Flywheel of proprietary vendor performance and client preferences from 5,000 plus clients with 75 percent CAC40 penetration plus switching costs as a vetted system of record in enterprise workflows, though commission-based revenue at 10 to 15 percent take-rate on €60 million volume creates lumpiness vulnerable to downturns despite recurring seminar mitigation; incumbents cannot easily replicate due to their focus on massive events overlooking tail spend.
- Founder
- CEO Maxime Eduardo demonstrates exceptional founder-market fit as a missionary with elite domain secrets from CentraleSupélec applied maths, Columbia operations research masters, Oliver Wyman consulting, and Labatut executive roles managing Siemens and Microsoft operations, blending quantitative rigor and Fortune 500 execution to build AI-native procurement solutions after scratching his own enterprise inefficiency itch.
- Thesis-fit
- Binary gates pass on seed to Series B stage, Europe with North America expansion geography, and events SaaS sector; semantic filters hit green flags for Vertical AI and Service-as-Software with excellent thesis alignment plus five percent modifier, no red flags like service business triggered; strong narrative alignment with Service-as-Software mandate automating manual agency headcount into platforms.
- Verdict
- CALL.

Based on current web signals, our proprietary investment methodology, and the investment thesis progressively refined through weekly decisions on each opportunity, the Synthetic GP recommends a CALL decision because Naboo captures the boring moat in underserved long-tail corporate event procurement (\$25B TAM) with AI consolidation, elite founder fit, and proven traction (75% CAC40, €60M volume), poised for oligopoly dominance via data/compliance flywheels.

MARKET STUDY

MARKET OPPORTUNITY SCORE
Hospitality & Travel > Corporate Event Procurement SaaS

IS IT AN ATTRACTIVE MARKET ? (Dynamics): $85/100 \times 25\% = 21.25$ points
IS IT A WINNABLE MARKET ? (Competition): $80/100 \times 25\% = 20.0$ points
IS IT A PENETRABLE MARKET ? (GTM): $90/100 \times 25\% = 22.5$ points
IS IT A REWARDING MARKET ? (Exits): $75/100 \times 25\% = 18.75$ points

TOTAL MARKET ATTRACTIVITY SCORE: 82.5/100

Market DEFINITION
AI-enabled procurement operating system for long-tail corporate event services targeting European and North American enterprises with 1,000+ employees and €10B+ revenue. This market addresses the highly fragmented spend on venues, catering, and travel for mid-sized corporate gatherings that typically bypass centralized procurement oversight.

Our Market THESIS
MARKET DISRUPTION : The emergence of Generative AI-driven procurement has created a new attack vector against legacy event agencies, whose reliance on human-heavy coordination makes them incapable of addressing the enterprise need for transparency and rapid scale. This opens a path for a startup to capture a significant share of the \$25B European corporate event procurement market with a targeted Service-as-Software model.

Our CONVICTION & WAGER on this Market:
HIGH: Our conviction is high because this market presents a rare alignment of timing and structure. The post-pandemic shift toward distributed teams has made offsites a non-discretionary operational requirement (system of record), yet the procurement tools remain stuck in the 1990s. This is a land grab to own the transaction layer of corporate culture.

ATTRACTIVE MARKET (Market Dynamics) | Score: 85/100
♦ Market Size: TAM: \$25B (EU/NA target) • SAM: \$5B • SOM: \$1B • CAGR: 12%
♦ Growth Drivers: Decentralized workforces requiring more frequent team offsites and 'culture-at-scale' initiatives.

WINNABLE MARKET (Competitive Landscape) | Score: 80/100
♦ Incumbents: American Express GBT (\$20B+ volume, Strength: Distribution) • Cvent (Strength: Event management workflow)
♦ White Space: Long-tail vendor procurement for events under 100 people is currently underserved by global giants who focus on massive conferences.

PENETRABLE MARKET (Go-to-Market & Unit Economics) | Score: 90/100
♦ GTM Model: Land-and-expand via HR departments, moving to centralized Procurement contracts.
♦ Unit Economics: High transaction value with transactional fees; targeting 10-15% take-rates.

REWARDING MARKET (Funding & Exit) | Score: 75/100
♦ Exit Multiples: M&A: 4-6x revenue for hospitality-tech; 8-10x for procurement-SaaS.
♦ Strategic Buyers: TravelPerk, American Express GBT, SAP Fieldglass (Ariba).
